

Individual Placement and Support

Individual Placement and Support (IPS) is an evidence-based practice of supported employment for helping people with mental health conditions gain competitive integrated employment. IPS also encourages mainstream education and technical training as ways to advance career paths.

IPS promotes employment as a part of treatment that aids mental health recovery, placing less emphasis on the traditional concept of employment “readiness.” Vocational services are integrated with clinical treatment in a team-based, supportive approach.

Research demonstrates that IPS participants achieve superior employment outcomes, such as double the competitive employment rate, fewer days to first job placement and four times as many weeks worked at follow-up.

Florida Vocational Rehabilitation and IPS

Florida Vocational Rehabilitation (VR) partners with community providers who utilize the IPS approach to provide supported employment services for individuals with serious mental health conditions. VR Participants receiving IPS services must have a primary mental health impairment resulting in a most significant disability and require Supported Employment services.

Participants are co-enrolled in services with the provider and VR to maximize available supports. VR contracts with approved service providers to provide supported employment services according to the IPS model, including job placement, stabilization and retention. Other VR services are also available to supplement the services provided by the IPS team, including benefits counseling, education/training and transportation. Long-term job retention supports are sponsored through other partners such as behavioral health managing entities. To learn more, contact VREmploymentPrograms@vr.fldoe.org.

VOCATIONAL
REHABILITATION

Participants Receive:

Assistance to attain competitive employment aligned with preferences

Benefits planning

Rapid engagement

Time unlimited supports

Integration of clinical and employment services

Providers Receive:

Ongoing training and technical assistance from an IPS Trainer

Support and collaboration from VR Counselors

Annual fidelity reviews

In Florida, IPS is provided through a collaboration between the Department of Children and Families' Office of Substance Abuse and Mental Health (SAMH), VR, behavioral health managing entities and a growing network of community providers.

IPS in Florida began in Broward County in 2017 in collaboration with Archways, Care Resource, Foot Print 2 Success, Pathways 2 Work, South Florida Wellness Network and Westcare.

The most recent IPS pilot includes collaboration with Citrus Health Network (Miami-Dade County), Helping People Succeed (Martin County) and Carrfour (Brevard County).

VR and SAMH continue to explore IPS implementation and intend to pilot IPS at additional sites as capacity and interest grow. To learn more about IPS, visit www.ipsworks.org.

Tallahassee, FL 32399-0400

The Florida Department of Education, Division of Vocational Rehabilitation (VR) is an equal opportunity employer. It is against the law for VR as a recipient of Federal financial assistance to discriminate against any individual in the United States on the basis of race, color, religion, sex, national origin, age, disability, political affiliation or belief. The application process used by VR to determine eligibility for services, any subsequent services and the entire VR process are subject to these non-discrimination requirements. Auxiliary aids and services are available upon request to individuals with disabilities. VR program receives 78.7 percent of its funding through a grant from the U.S. Department of Education. For the 2022 Federal fiscal year, the total amount of grant funds awarded were \$175,063,093. The remaining 21.3 percent of the costs (\$47,775,094) were funded by Florida State Appropriations. Revised October 2023.
